Frameworks

- React JS
- Next JS
- Tailwind CSS
- Bootstrap CSS

UI/UX

- Figma
- Canva (soft skills)

#About

Beginning my journey within the bachelor's degree in frontend and mobile development at Kristiania University College. Driven by a strong passion for software development, I commit myself to structured learning. Although I may be new to this path, I am dedicated to mastering new challenges and embrace teamwork. I look forward to learning from experienced professionals and developing my skills through collaboration. In the past, I have worked on some projects while I was self-taught. These projects are not personal, but from the learning platform that has contributed to my competence.

#Projects

Movies/TV-shows news | <https://movix-self-nine.vercel.app/> | **Technologies used** : React, Redux, SCSS, TMDB API

- Used Redux to handle data management between components
- Used SCSS for styling
- Used React-Router-Dom for dynamic routing
- Integrated API endpoint from themoviedatabase.org (TMDB)

Food app | <https://food-app-blue.vercel.app/> | **Technologies used** : React, Tailwind, Unsplash Images

- Implemented filtering feature for food options based on categories and price ranges
- Used Tailwind CSS for efficient styling and customization
- Developed dynamic data fetching functionality to populate components with images and data from a separate file
- Designed and implemented a responsive user interface for seamless cross-device experience
